

Introduction of the Speakers:

Centrale Bank van Curacao en Sint Maarten

Mr. Carolus Walters

Mr. Carolus (Cai) Walters has over 20 years of experience in the IT Industry in the financial sector. He has worked as a programmer, systems-analyst, head of the systems development department and as a Project Manager.

Currently he works as an IT Auditor, Policy writer and is active in the IT Security Committee of the Central Bank.

Mr. Walters holds a degree in Business Administration and Computer Science.

He is certified for Network+ and Security+ and is also a Certified Information Systems Auditor ('CISA').

Jeffrey Sybesma

Jeffrey (Jeff) Sybesma is head of the Legal Department of the Central Bank. He has a law degree from the University of the Netherlands Antilles and has published several articles on legal topics.

The title of his lecture will be "Data Retention: Legal Obligations and Technical Challenges. Since he has no profound knowledge of IT, such as the *nitty and gritty* of hard- and software, it was indeed a challenge for him to put this presentation together and I can testify on that.

It is because of this that he wants to, as a good lawyer; exonerate himself beforehand from possible inaccurate data presented. Also, again, as every good lawyer should always do, Jeff wants to state explicitly that everything he says and presents is not necessarily the opinion of the Central Bank of Curaçao en Sint Maarten. The opinions and remarks offered during this presentation are therefore fully his own.

4ITBIZ-Curacao

Aishel Loefstok-Isabella

Aishel Loefstok- Isabella, is the Managing Director of 4IT Business Consultancy. 4IT Business Consultancy was established in September 2010 and is a company that deals with the provision of services to companies in the field of management, training, and Information Technology in general as well as management of supporting information technology in particular.
